PROJECTS:

E- commerce Website :

- This website is a Virtual website "E-Commerce website" built using **Python's** web framework **Django** and database using **MySQL**.
- It provides a list of products available for purchase, a shopping cart and an order confirmation process.
- The system ensures securely with the use of login ID and passwords, so that no unauthorized users can access your account.
- The project also includes key features such as product selection, quantity adjustment and order placement.

Portfolio Website :

- As a full stack developer, I have expertise in building dynamic and **responsive web applications** using a variety of technologies.
- This website using technology **html, CSS, bootstrap, JavaScript** and additional packages.
- My Portfolio showcase my skills and my projects in both front-end and back-end development with a focus on creating clean, user-friendly interfaces and efficient, scalable code.
- Overall, my portfolio is a testament to my skills and experience font-end development
